

ABOUT PROGRAMME

Graduates will gain knowledge at engineering level from the subjects Theoretical Fundamentals (mathematics, constructive geometry, physics, chemistry, computer graphics) and preparatory theoretical courses with closer focus on mechanical engineering (mechanics of rigid and deformable bodies and environment, studies of material, thermodynamics and fluid mechanics). Such knowledge will be useful in practice and for further development in engineering applications. They will also gain a good knowledge of technology fundamentals, as well as the fundamentals of law and economics. Students will also reach intermediate level of technical foreign language. The course includes also humanities and physical education.

DEGREE

Bachelor

NO. OF YEARS

3 years

APPLICATION DOCUMENTS

Application form Copy of high school or secondary school graduation certificate certified by a notary, English proficiency certificate

ENTRANCE EXAM

Direct admission based on sufficient educational background

LANGUAGE OF STUDY

English

APPLICATION DEADLINE

30th April

TUITION FEE PER YEAR

4074 EUR / 110000 CZK
